General Advisory:

IMD Weather forecast and Agrometeorological advisory of your location is now available on Meghdoot mobile app in English and regional languages. Kindly download from following link Android: <https://play.google.com/store/apps/details?id=com.aas.meghdoot> iOS: <https://apps.apple.com/in/app/meghdoot/id1474048155> Necessary arrangement of nutrients should be done for crops and weeding, hoeing and irrigation should also be done.

SMS Advisory:

In the coming five days, very light rain may likely occur on 12 Jan otherwise weather will remain clear. Farmers are advised to irrigate the crop as per requirement.

Crop Specific Advisory:

Crop(Varieties)	Crop Specific Advisory
-----------------	------------------------

Crop(Varieties)	Crop Specific Advisory
WHEAT	It is advised that wheat crop should not be sown in the month of January because wheat sowing during this period causes the yield reduction of 60-65Kg/Ha/day and hot wind during ripening stage of crop causes thinning of wheat grain. Second irrigation should be given at 40-45 days of sowing. To control the broad leaf weed, solution of 2,4 D @ 500 g/ha or metsulfuron methyl @ 4.0 g/ha in 30-35 days after sowing and isoproturon @ 1 kg/ha in case of narrow leaf weed in 30-35 days after sowing should be used.
SUGARCANE	To save the standing naulakh sugarcane crop from frost, necessary irrigation should be applied. Harvesting of early naulakh sugarcane should not be done at this low temperature.

Horticulture Specific Advisory:

Horticulture(Varieties)	Horticulture Specific Advisory
ONION	Transplanting of onion should be completed till 15 January. Line to line and plant to plant distance should be 15 cm and 10 cm respectively.
POTATO	To control the late blight disease in potato, it is advised that solution of Mancozeb @ 2.5g/liter of water should be sprayed.
CAULIFLOWER	To control the leaf spot disease in cole crops, the solution of mancozeb @ 2.5 g/liter of water should be sprayed.

Live Stock Specific Advisory:

Live Stock(Varieties)	Live Stock Specific Advisory
BUFFALO	To save the animals from the cold, proper arrangement of the animal shed should be done. To save the animal from cold, increase the amount of oil and Jaggery (Gur) in the food of animals. Caraway (Ajwain) and gur also be given to the animals. In hilly areas, the heater may be used to protect the animals from cold. Rice husk should be given to the animals as food which is the source of energy.
