Weather Summary/Alert:

In the upcoming days very light rainfall of 1.0 mm has been predicted for 1 February. Maximum & minimum temperature may be 19.0-20.0 degree Celsius & 5.0- 6.0 degree Celsius, respectively. Wind is expected to blow with a speed of 6-9 km/hr primarily from the north-north-west, south-east-east and south-east direction. Very light to light rain is likely to occur at isolated places on 01 February. Dry weather likely to prevail during rest of the period.

General Advisory:

A regular update regarding weather forecast and agrometeorological advisory is available on the "Meghdoot App" and "Damini App" is also available to get lightning information. Meghdoot and Damini apps can be downloaded from Google Play Store (Android users) and App Center (iOS users). The NDVI composite shows good agricultural vigour in the region. The extended range forecast system shows large deficient rainfall and normal maximum-minimum temperature trend during 24-30 January.

SMS Advisory:

Irrigation should be applied when required and small seedlings should be saved from extreme cold conditions and chilling injury.

Crop Specific Advisory:

Crop (Stage)	Crop Specific Advisory
LENTIL	The crop should be regularly monitored for weeding and hoeing while irrigation should be applied as per requirement. Occurrence of plant rot can be treated with appropriate fungicide application.
RAPSEED	The crop should be monitored regularly and time to time irrigation should be provided. Diseases should be monitored and control measures should be taken up.
MUSTARD	The crop should be monitored regularly and time to time irrigation should be provided. Diseases should be monitored and control measures should be taken up.

Crop (Stage)	Crop Specific Advisory
