No warning has been issued for the upcoming week and the weather is expected to remain dry in the upcoming week.

Weather Warnings (Valid Till 08:30 IST of the next day)

No warning has been issued.

Likely impacts of weather warnings on Agriculture and associated Agromet advisories

No significant impact and advisory.

General Advisory:

The farmers and other related community can download the "Mausam" app for regular weather information and rainfall alerts. Other apps like "Meghdoot" and "Damini" are also available for regular update of meteorological and lightning data, respectively. All the apps can be easily downloaded from Google Play Store (Android users) and App Centre (iOS users). The extended range forecast shows dry pattern for rainfall, normal maximum and below normal minimum temperature trend during 07.11.2025 to 13.11.2025.

SMS Advisory:

As per IMD, no warning has been issued so rabi sowing and other agronomic activities should be continued.

Crop Specific Advisory:

Crop (Stage)	Crop Specific Advisory
GROUNDNUT (Harvesting)	On ripening the crop should be dug out and after proper drying should be stored well.
PIGEON PEA (RED GRAM/ARHAR) (Harvesting)	The crop should be monitored for pest attack and pest management measures should be taken up in the crop. If 75-80% pods have ripened in early varieties then the crop should be harvested.
CHICK PEA (Sowing)	Under rainfed conditions, the last month sown crop should be regularly monitored and weeding should be done at 25-30 days while under irrigated conditions the crop sowing should be done till first fortnight of the month.
LENTIL (Sowing)	Under rainfed conditions, the last month sown crop should be regularly monitored and weeding should be done at 25-30 days while under irrigated conditions the crop sowing should be done till first fortnight of the month.
RAPESEED (Sowing)	Regular monitoring of the timely sown crop is important and should be irrigated as and when required before flowering while sowing should be completed.
MUSTARD (Sowing)	Regular monitoring of the timely sown crop is important and should be irrigated as and when required before flowering while sowing should be completed.
WHEAT (Sowing)	Under rainfed conditions the crop should be sown till first week of the month and under irrigated conditions till first fortnight of the month.
FIELD PEA (Sowing)	Under rainfed conditions, the last month sown crop should be regularly monitored and weeding should be done at 25-30 days old crop while under irrigated conditions the crop sowing should be done till first fortnight of the month.

Horticulture Specific Advisory:

Horticulture (Stage)	Horticulture Specific Advisory
ONION (Sowing)	The rabi season onion crop should be sown this month.
POTATO (Sowing)	The sowing of potato varieties such as Kufri Badshah, Kufri Jyoti, Kufri Alankar, Kufri Chandramukhi, etc. should be done.
